

TexPrint™

"Green"

Super Economy Grade Sublimation Paper

TexPrint **GREEN** is a revolutionary new dye-sublimation paper that not only delivers premium quality with exceptional value, but is also the industry's first ever 100% environmentally friendly digital dye-sublimation paper.

TexPrint GREEN digital dye-sublimation paper is...

- Made with fiber from 100% sustainable, managed forestry reserves
- Contains NO bleaching agents
- Excellent dimensional stability at high speeds and heavy ink loads

- NO back gassing
- Extremely ink efficient
- 100% Natural unbleached fiber
- Up to 1/2 the transportation costs/storage/disposal due to the light weight sheet
- Contains NO Chlorine

- 100% recyclable
- Less expensive than other dye-sublimation papers
- More square meters per roll than any other paper means less change over and more productivity.

This leading edge technology works well on all popular large-format dye-sub printers, including:

- Epson
- Roland
- Mimaki
- Mutoh

Available in...

- 55sgm and 72gsm basis weights.
- In widths from 24" up to 72"
- Special sizes available upon request
