

YAG-75DP LASER MARKING MACHINE

- * **Aquatex** standard colours for use on **pre-washed** natural fabrics such as calico, seed cloth, 100% cotton. These paints are translucent and may be used on white, cream or very pale pastel coloured materials
- * **Aquatex** Colourbrite opaque colours also known as mock discharge - for use on **pre-washed** fabric as well as cotton / synthetic mixtures. Suitable for use on **white and coloured** fabrics
- * Colours are water soluble and intermixable. Wash brushes in warm soapy water.
- * Add colours to extender base to lighten colours
Add opaque white to colours to obtain pastel colours
Add pearl base to colours to obtain pearlescent finish
- * A little water may be mixed into paint if necessary, but too much will make the colours bleed
- * **Heat Setting Instructions**
(If paint is not heat set properly, colours will wash out or fade)
Allow painted fabric to dry thoroughly
Fold fabric with the painted side inwards and place on a baking tray in the oven
Heat to 140°C and bake for 6 - 10 minutes depending on the size of fabric
Turn oven off and remove fabric when oven has cooled down
- * **Heat setting instructions for Dyefoam Puff Paints**
Paint fabric with **Aquatex** colours. Allow project to dry thoroughly and heat set according to instructions as set out above.
Apply puff paint where required and allow to dry thoroughly
Place in pre-heated oven at 120°C for 30 seconds and remove from oven
- * Save on bulk purchases - buy **Aquatex** clear extender base and mix your own colours with **Aquatex** pigments
